

R&D Exchange: Country-Identified R&D Needs for Forest and Land Monitoring

This event will begin shortly...

Lead partners

GFOI is a flagship of the  **GROUP ON EARTH OBSERVATIONS**

The GFOI Office is financed by the Governments of Norway and the United Kingdom

What are R&D Exchanges?

- A **series of online events** designed to foster discussion on evolving forest monitoring methods and their applications in national forest monitoring systems.
- A **dynamic platform** for interactions between the GFOI community and the forest monitoring research community
- Topics addressed previously:

Forest
disturbance
alerts

Tropical Wetland
Monitoring

Forest
degradation
monitoring

Uncertainty
Assessment &
Communication

- **Interested in presenting your experience in these events?** Please contact the GFOI Office (GFOI-office@fao.org)

Today's agenda

1. **Introduction to today's session**
2. **GFOI R&D Country Needs Assessment** – Sylvia Wilson (WilpaCD)
3. **Estimating forest removals: the case of Costa Rica** – German Obando Vargas (Costa Rica)
4. **Estimating GHG emissions from land-use change in Cameroon using Collect Earth Online** – Destin LOKEGNA (Wilpa CD)
5. **AI in forest monitoring: opportunities and challenges** – Maria Pilar Valbuena Perez and Erik Lindquist (FAO)
6. **Q&A, feedback and closing remarks**
